

# belle+

confidence to get out and do what you love

*Belle+™ is a small, easy to use emergency alert pendant with fall detection and GPS and WiFi location technologies. It offers you the confidence to do what you love. Get help easily at home or away, anywhere in the US where there is AT&T coverage.*

## Here's how it works...

### speaker

It's easy to hear the specialist answer your call with this powerful speaker.

### call button

Just press one button to speak with a specialist who can locate you and send help. It's that simple.

### battery light

A red battery light will flash to notify you that Belle+ needs to be charged. The light is solid when charged.

### call, wifi & gps lights

After you press the call button, a small blue light will alert you that your call is being relayed to a specialist. The blue WiFi and GPS lights will flash when Belle+ is being located.

actual size

### microphone

A powerful microphone allows you to speak with a kind, courteous specialist. They can locate you and send emergency help or contact a loved one to assist.

Belle+ can automatically connect to care specialists if it detects a fall. Belle+ can be located with GPS and WiFi location technologies. Belle+ is IPX6 water-resistant, though it should not be submerged.

The rechargeable battery lasts up to 5 days per charge. A simple charging cradle makes recharging easy.
